

landproDATA

# ENGINEERS & PLANNERS

Digitalize your existing data into our cloud GIS system and overlay plats, aerals, and parcels in Idaho's 44 counties.

## AMAZING FEATURES

### MAPPING

Use mapping tools to produce reliable proposals in less time.

### CUSTOMIZED DATA

Upload your data to **landproDATA** and create unique company layer sections on the map.

### REPORTS

Generate a custom Property Info Book complete with plats, zoning, FEMA maps, traffic counts and more in a few clicks.

### PROJECT DETAILS

Upload notes and photos from the field to your project so they're always available online and in one location.

### NEWS

Stay informed of land development events with private and public newsfeeds and our Newsletter.

## WHY CHOOSE US?

Upload your GIS data to landproDATA layers to see the big picture.

Identify adjacent property owners to conduct neighborhood outreach.

View zoning, surrounding developments, boundaries, hydro lines, and more.

Know about land developments and who the players are before your competition.

Customize company projects to track and share with your team.

## ABOUT US

Developed by a land professional for land professionals, **landproDATA** provides a data-driven mapping tool that gives Engineers and Planners the comprehensive, accurate GIS data, visuals, and reports you need. Our web-based solution allows you to gather information quicker, keep your customers happy, and not miss the latest news for team projects. Anytime. Anywhere.
