

landproDATA

Digitalize your existing data into our cloud GIS system and overlay plats, aerials, and parcels in Idaho's 44 counties.

SURVEYORS

AMAZING FEATURES

MAPPING

Locate ROS, CPFs, and plats from any web-connected device.

CUSTOMIZED DATA

Upload your data and create unique company layer sections on the map.

REPORTS

Generate a custom Property Info Book and Vicinity Maps in a few clicks.

PROJECT DETAILS

Upload notes and photos from the field to your project so they're always available online and in one location.

NEWS

Stay informed of land development events with private and public newsfeeds and our Newsletter.

WHY CHOOSE US?

Customize company projects to track and share with your clients or team.

Explore topography and terrain and avoid obstacles before a site visit.

Share ROS, CPFs, plats, and maps with field personnel at anytime.

Know about land developments and who the players are before your competition.

Reduce wait and travel time for public records requests.

ABOUT US

Developed by a land professional for land professionals, **landproDATA** provides a data-driven mapping tool that gives Engineers and Planners the comprehensive, accurate GIS data, visuals, and reports you need. Our web-based solution allows you to gather information quicker, keep your customers happy, and not miss the latest news for team projects. Anytime. Anywhere.
